ABOUT ME

After joining the college of social work, I felt that this is not my place, so I studied programming through YouTube, then I joined the Ministry of Communications FWD scholarship in JavaScript & react. I finished the scholarship and continued learning from YouTube until I became a full-stack next.js. Then I finished my university studies and completed my military service period, and I am now available for work. In the coming period, I am planning to join the Diploma in Computer Science and Artificial Intelligence at Cairo University. Wish me success.
